## Create a new repository

A repository contains all the files for your project, including the revision history.

Owner

Repository name

NTUST

/

106-team00

Great repository names are short and memorable. Need inspiration? How about **probable-octo-garbanzo**.

Description (optional)

Public

Anyone can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

☐ Initialize this repository with a README

This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: None

Add a license: None

## Give access to the people you work with

You should give access to the collaborators and teams you need to work with.

Add teams and collaborators

## Quick setup — if you've done this kind of thing before

Set up in Desktop or HTTPS SSH git@github.com:NTUST/106-team00.git

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).
